## Professional Summary

---

A software developer with experience developing innovative, reliable and user-friendly systems. A creative and dynamic thinker able to create scalable web applications that contribute to organizational success.

## Education

---

### University of Ibadan

M.Sc. Software Engineering

July 2019 - Feb 2022

### University of Ibadan

B.Sc. Computer Science

April 2015 - Feb 2018

### Educational Advancement Center

Cambridge A-levels

June 2013 – July 2014

## Work Experience

---

### Crop2Cash

*Software Engineer, Aug 2021 - Present*

- Building and maintaining systems that make up the Finag app. Finag is a USSD based service that digitizes financial services as well as the management of farmers supply chain.
- Collaborating with other developers physically and via GitHub to build and deploy the Base Dashboard that was built to assist customer support in managing user requests and access information from the database.
- Helped test and refactor the codebase for Finag, which improved the efficiency of the app and ultimately resulted in a 43% decrease in errors reported on the server.

### GoodChat

*Software Developer, Contract, Dec 2020 – August 2021*

- Built a service that enabled users to get access to cheap therapy like sessions that brought an improvement to their lives.
- Worked with other developers via GitHub to build and deploy the webapp built using Django REST Framework to drive the backend and ReactJS for the frontend.
- Wrote code to manage stages of sessions, from scheduling to completing. These functions ensured transactions were completed without error.

### Selorm

*Software Developer, Contract, Oct 2020- Present*

- Designed and built backend of e-commerce website that boosted the sales of skincare products.
- Integrated payment methods with Paystack that ensured smooth payment transactions.
- Implemented unit and integration tests on backends components.

### Tempo Paper, Pulp and Packaging Limited,

*ICT Intern, Apr 2018 – Mar 2019*

- Designed and built Visitor Management Portal on company intranet that made tracking of visits to the company easier for admin.
- Deployed Visitor Management Portal on Windows IIS Server. The server was on the company network and this allowed only users within the company to access the portal.
- System setup and maintenance of MySQL database.
